

Your AI, stavolta per davvero.

Un progetto aperto per costruire AI portatile, sovrana e production-ready: dal tuo contesto ai tuoi workflow, fino a un'intelligenza comune al servizio di tutti.

THIS IS NOT YOUR AI.

What would “your AI” actually mean?

Context is all you need.*

A Brain is not a RAG.

Right context. Right time. Right rules.

Bigger $\neq$ better automation.

Presentazione rapporto EdTech 2026 @ Camera dei Deputati

USEFUL AUTOMATION =

Evals &
governance

If one tends to zero, the result tends to zero.

Your AI, **stavolta per davvero.**

Portable. Sovereign. Production-ready.

CONTEXT + WORKFLOWS + RULES durable layer

Model optional. Runtime optional. Your context isn't.

We went down the stack.

Real numbers. Local inference.

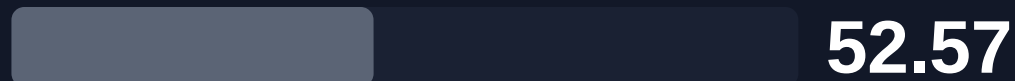

~2.18x

Sovereignty = choice.

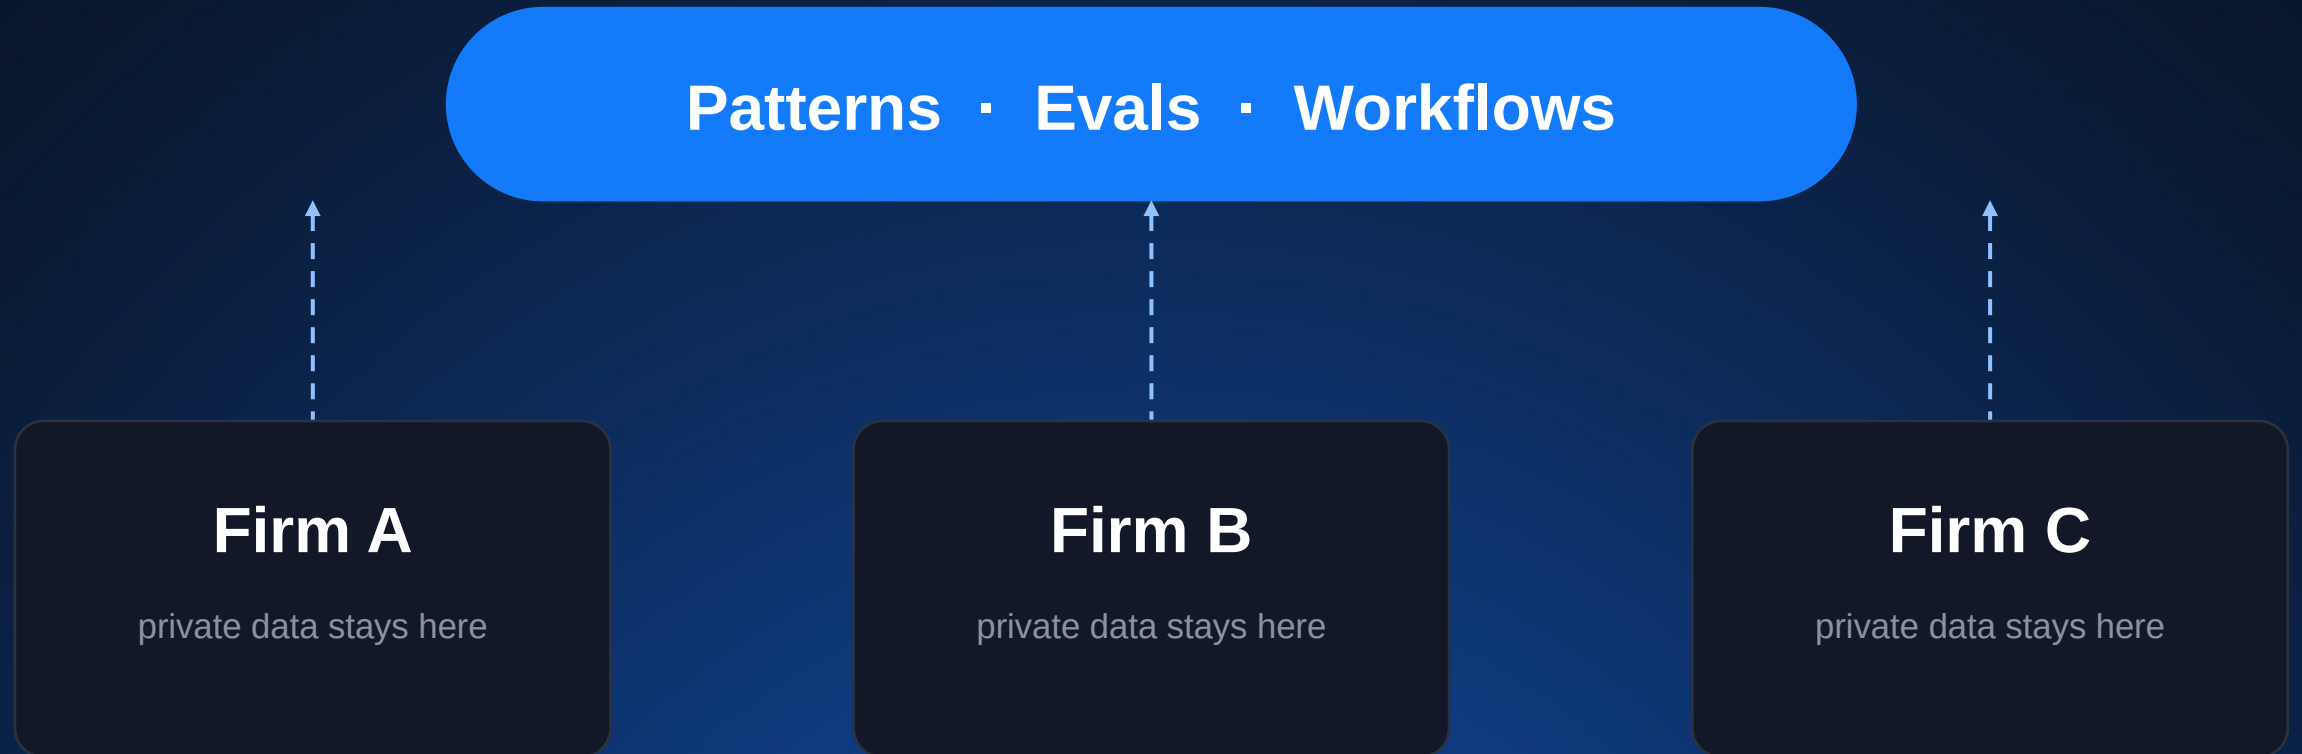

Your rules.

privacy · capability · latency · cost · regulation

Private brains. Shared intelligence.

Keep the data. Share what you learn.

Some things can't be tested in a garage.

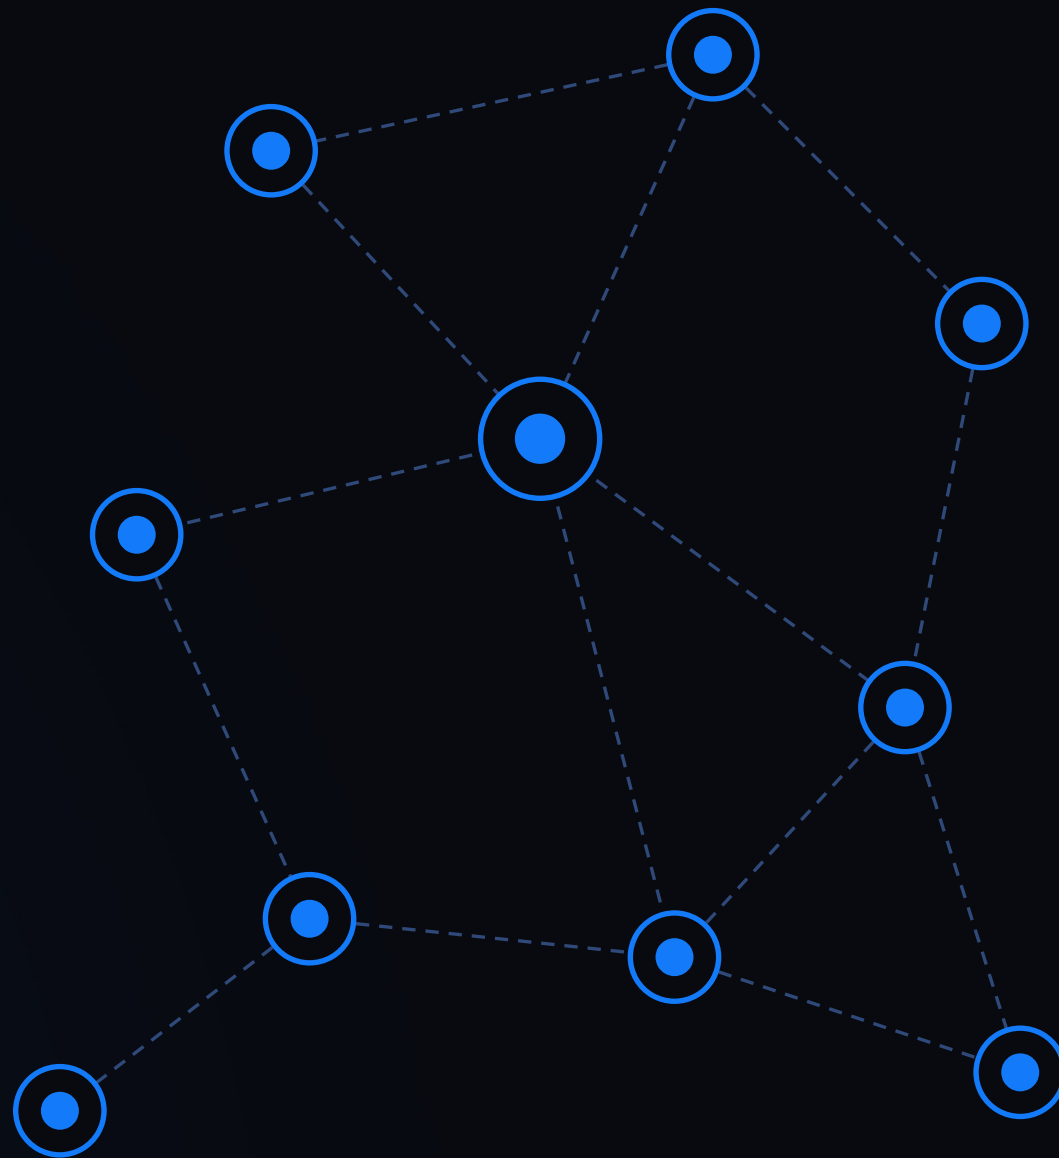

Technology × Law × Institutions

From your AI → AI for all.

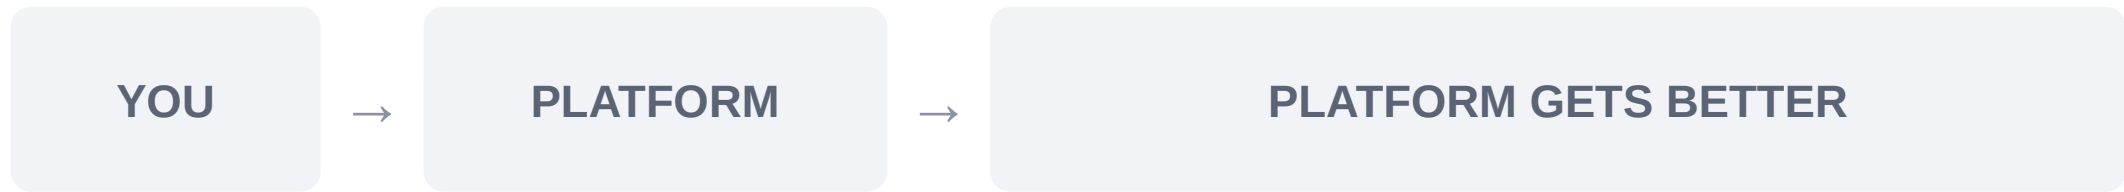

Private by default. Connected by choice.

Sovereign minds. A more intelligent ecosystem.

Who gets better from your data?

TODAY

OUR DIRECTION

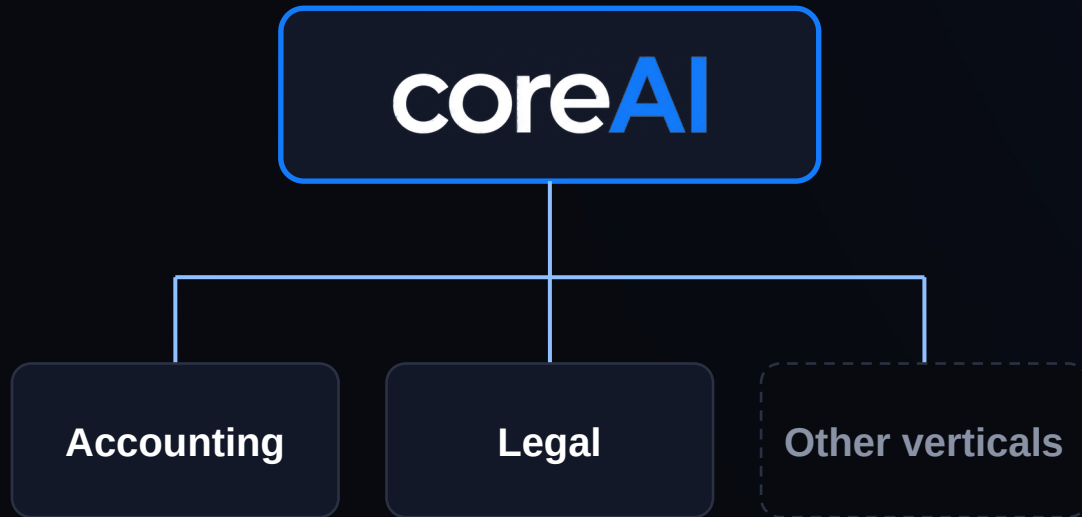

Your data should compound your advantage.

Not only somebody else's model.

The first “AI-first” AI company.

coreAI runs on coreAI.

Then we build the verticals.

One initiative. Many layers.

Infrastructure
